TITLE Public Elementary-Secondary School Enrollment: 50 States and the District of Columbia, Fall 1984. OERI Historical Report.
INSTITUTION Center for Education Statistics (OERI/ED), Washington, DC.
REPORT NO OERI-CS-86-110h
PUB DATE Mar 87
NOTE 8p.; Small print in tables 3-5.
PUB TYPE Statistical Data (110)

EDRS PRICE MF01/PC01 Plus Postage.
DESCRIPTORS Elementary Secondary Education; *Enrollment; Enrollment Trends; National Surveys; *Public Schools; *School Statistics; Tables (Data)

ABSTRACT

Five tables present statistical data on enrollment in the public elementary and secondary schools of the 50 states and the District of Columbia in the fall of 1984. The introductory text notes trends observable in the data (including a national decrease in enrollment between 1983 and 1984 of 47,000 students, or 0.1 percent of the 1983 student population) and provides technical notes on the methods used by the Center for Education Statistics to obtain the data presented. The first table displays the enrollment figures for fall 1983 and fall 1984 for the eight states that experienced enrollment declines of 10,000 or more, and identifies each state's share in the national decrease. Table 2 shows similar data for the six states experiencing enrollment gains of 10,000 or more. The third table shows public school enrollment in each of the 50 states and the District of Columbia for two levels of instruction (prekindergarten through 8th grade and 9th grade through 12th grade) for fall 1983 and fall 1984. Table 4 displays each state's enrollment changes over the year at the two levels of instruction. Table 5 displays each state's enrollment at individual grade levels for fall 1984. (PGD)

March 1987

Public Elementary-Secondary School Enrollment: 50 States and the District of Columbia, Fall 1984

In fall 1984, there were about 39.3 million students attending public elementary and secondary schools in the United States. This number represents a net decrease of more than 47,000 students or 0.1 percent since fall 1983 (table 3). This decrease continues the decline in public school enrollment which began in the early 1970's. This latest decline in enrollment was less than the decline from fall 1982 to fall 1983, which was 456,000 or 1.1 percent.

Decreased Enrollment Reported in Most States

Twenty-nine States and the District of Columbia reported enrollment decreases ranging from 0.1 to 2.2 percent. Decreases of at least 10,000 students or more were reported by 8 of these States (table 1). Their combined amount (183,000 students) represented 70 percent of the total U.S. decrease (263,000 students). The largest decreases were reported by Pennsylvania (36,000), Michigan (29,000), New York (27,000), and Ohio (22,000). The largest percentage decreases for the year, however, were reported by Massachusetts and West Virginia (2.2 percent), Pennsylvania (2.1 percent), and Connecticut (2.0 percent) (table 4).

Increased Enrollment Reported in Some States

Increases for fall 1984 enrollment totaling 216,000 students were reported by 21 States. Increases of at least 10,000 students or more were reported by 6 States, with the largest increases in California (62,000) and Texas (51,000). The combined increases for the 6 States represented 87 percent of the total U.S. increase (table 2). Although California reported the largest absolute increase, it represented only a 1.5 percent increase over the previous year's enrollment. The largest percentage increases over the previous year's enrollment were reported by Alaska (6.5 percent), Arizona (4.6 percent), and Utah (3.2 percent).

Twelve States – California, Texas, Florida, Arizona, Georgia, Utah, Alaska, Wyoming, Hawaii, Idaho, Montana, and North Dakota – reported increases in both the elementary and secondary grades.

Technical Notes

Data on public school enrollments for fall 1984 were provided through the Common Core of Data (CCD) Survey, Part V (State Nonfiscal Report). The Survey was conducted by the Center for Education Statistics (CES) with the assistance of the State education agencies (SEAs) in the 50 States, the District of Columbia, and outlying areas under U.S. jurisdiction. Data for the outlying areas are not included in this report but are available upon request. The data were derived from the administrative records in each State.

In compiling these data from administrative record systems, each SEA obtains fall enrollment reports from the local education agencies (LEAs) that operate public schools. Each SEA uses various collection methods to obtain these data, and the "as of" dates for enrollment counts may vary from State to State. Each SEA may edit or examine the individual LEA reports according to its own rules before computing State totals. Upon receiving data from each State, CES edits the reports using a machine edit procedure to check for internal and longitudinal consistency. Questionable entries are returned to the SEA for verification or correction before publication.

For more information, contact Lena McDowell, Center for Education Statistics, 555 New Jersey Avenue NW., Washington, D.C. 20208-1401, (202) 357-6628.
